Copper inversion | 31 matched charged sources | seeds 42 / 43 / 3407
Best training loss vs. charged budget
Loss = 1 - mean IoU; lower is better
Charged sources (including rejection / duplicate)
LDM
MCMC
ACQ
Seed variation at budget 31
Best training loss
Selected solver runtime
Mean seconds per case (log scale)
120 s limit
Training only. Shading = sample SD (3 seeds). Baseline duplicate cost retained. Runtime excludes algorithm discovery.
